

Ideal GSA Contract Extended Through the Year 2013

The U.S. General Services Administration (GSA) awarded Ideal System Solutions, Inc. its first option extension for their GSA Contract GS-35F-0845N through the year 2013.

Founded in 1949, GSA serves as a centralized procurement and property management agency for the federal government. GSA manages more than one-fourth of the government's total procurement dollars and influences the management of \$500 billion in federal assets, including 8,600 government-owned or leased buildings and 208,000 vehicles. GSA helps preserve our past and define our future, as a steward of more than 425 historic properties, and as manager of USA.gov, the official portal to federal government information and services. GSA's mission to provide superior workplaces, expert technology solutions, acquisition services, purchasing and E-Gov travel solutions and management policies, at best value, allows federal agencies to focus on their core missions.

The U.S. General Services Administration is the federal government's business arm with combined revenue of billions of dollars per year. If it were a private company it would rank among the Fortune 100.

As an innovative small, HUBZone, disadvantaged, woman and minority-owned company, Ideal is proud to further its mission to provide efficient and effective information technology products, professional services and total solutions to customers in the federal acquisition community.
