BCWipe Now On GSA Via Ideal System Solutions

GSA Schedule Awarded To Jetico's DoD-Approved Wiping Software

MAPLE GROVE, MN – January 29, 2009 – Value added reseller Ideal System Solutions is proud to announce today that Jetico's [BCWipe](#) data deletion software is now available on their GSA Schedule. For many years, BCWipe has been trusted by the U.S. Department of Defense for permanently deleting selected data or erasing entire hard drives beyond recovery. U.S. government agencies, including the Department of Defense, can now easily make volume license purchases of BCWipe through Ideal's GSA Schedule.

"BCWipe has long been the gold standard for our government and military customers looking for data wiping software," says Fran Melia, Account Manager at Ideal System Solutions. "Adding such highly valued software like BCWipe to our GSA Schedule is very exciting, particularly because Ideal is now the first and only source for BCWipe on GSA."

BCWipe is a powerful, industrial strength utility to wipe data with U.S. DoD 5220.22-M, DoE M 205.1-2 and German VSITR standards, as well as the Peter Gutmann and Bruce Schneier wiping schemes. BCWipe's new Transparent Wiping feature securely wipes deleted or temporary files automatically on the fly, eliminating time-consuming processes to wipe free space, wipe temporary files or wipe old file versions.

Security expert Bruce Schneier recently praised BCWipe's new Transparent Wiping feature. "Previously 'wipe free space' was a slow operation that I had to remember to run manually," said Schneier. "With Transparent Wiping running in the background, I will always be working in a totally clean environment."

"We are honored by Ideal's addition of BCWipe to their GSA Schedule," says Panu Pietikainen, COO, Jetico. "Jetico is driven to continually improve our ability to serve our U.S. government customers. Enabling GSA procurements is an important step in the right direction for simplifying their process."

About Jetico

Jetico provides military-standard data protection software for all highly sensitive information and mission-critical data throughout the lifecycle. Approved for use by the U.S. Department of Defense, BCWipe surgically removes all traces of selected data, while BestCrypt disguises the data you need to keep with convenient, reliable encryption. For central administration and policy management, Jetico offers an Enterprise product line, highlighted by BCWipe Enterprise featuring Enforcer.

Jetico products are used in over 100 countries by government and military agencies, national laboratories, industrial manufacturers, as well as various other enterprises and a wide global base

of home and small business users. Founded in 1995, Jetico is privately held and headquartered in the Otaniemi Science Park in Helsinki, Finland. For more information please visit www.jetico.com.
